ACADEMIC PROJECT

Title: TREADMILL ON BICYCLE | Environment: WORKING MODE | Description: It is combination of TREADMILL and BICYCLE. In this bicycle, the frame is completely modified and the treadmill is placed between the two wheels as use walls or runs on the treadmill belt move to rear. At the rear roller RPM sensor is attached and it senses the spread of the roller and sends signals to motor and by which we can get motion of the wheel and Bicycle runs
